1. Read the text and choose the correct answer.

Enviroment: toasting the globe in 2000s

New scientific studies point out that humans must convert to solar power fast, or it will cost us dearly in the next millennium. According to a study released this week by the Environmental Defense Fund, overuse of the fossil fuel will cause Earth's average temperature to increase significantly in the next 100 to 200 years. And it will remain well above current levels through the year 3000.

Computer climate models predict our average temperature will rise by at least 3 degrees – and as many as 10 – by 2200.
